To Whom It May Concern:

Vivek Bhat
919-945-6947
vivek.bhat@intel.com

I am a Software Engineer working for Intel. My experience here at Intel has provided me with the innovative and technical skills necessary to successfully provide your team with multifaceted technical solutions across a wide range of software platforms.

I have experience developing innovative software solutions using Java, JavaScript, AWS, HDFS, HBase, Apache NiFi.

In my most recent project I was instrumental in implementing the key features to take Apache NiFi to production in CDR to replace a monolithic legacy data ingestion application used for ingesting big data into HDFS. This led to a **3x improvements** in throughput, reliability, reduced maintenance and increased automation.

Details of my other projects and experiences can be found on my resume or on my personal Angular based website: https://vivekbhat.me and on my GitHub profile: github.com/VivekBhat.

Sincerely,
Vivek Bhat
